

Self-Serve Kiosk Pay Station

zControl is a complete operations management system for valet parking operations. Provide your parkers with efficient service, empower your staff to achieve higher performance standards and have operations control at your fingertips.

The Ultimate in Customer Convenience

ZipPark's self-serve kiosk pushes customer convenience and satisfaction to a new level. Customers quickly and easily pay for parking while avoiding lines and freeing up your cashiers. Place these stylish kiosks near your cashiering stations or at a remote location and watch your customers flock to them.

IBM Style & Reliability

Running on the IBM Anyplace Kiosk, zControl's Self-Serve software benefits from the style, reliability, and support built into IBM products. It's the perfect platform for your customers: sleek, stable, secure.

Quick, Easy and Powerful

The ZipPark Kiosk from IBM allows your customers to quickly pay for their parking and begin the vehicle retrieval process. The full-color touchscreen display guides your customer through a few simple steps to complete their transaction. All instructions are clear and understandable. And extra help is always at their fingertips.

Self-Serve Kiosk Pay Station

A Few Simple Steps

Your customer is guided through the steps of scanning their claim check, swiping their credit card, and retrieving their receipt. The entire transaction can be completed in less than one minute.

Reduce Manpower, Satisfy Customers

ZipPark's self-serve kiosk is a win-win solution. Customers pay for their parking without the need of a cashier so you reduce labor costs. And, because they serve themselves, there's no waiting in lines. Less waiting means happier customers, customers that will return again and again. Kiosks can be added at anytime to keep up with demand as more customers self-serve. And, unlike adding personnel, there's no learning curves or training necessary to become fully productive. Just plug it in and go.

Flexibility Built In

Configurable to allow all customers to self-serve, or just VIPs, we designed the kiosk software to be flexible...the way you run your business. You can even configure it to simply request vehicle retrievals and still cashier customers at the point-of-sale computers.
