

# Micro Vehicle Request Kiosk

## *Improve customer service, satisfaction, and loyalty*

Improve the customer experience with ZipPark's Vehicle Request Micro Kiosk. Valet customers request their vehicle without interacting with an attendant or cashier. They simply scan their barcoded valet ticket and your attendants are made aware of the request instantly. In the key room, a runner stub is printed or the request appears on the ZipPark Jockey Console. The Vehicle Request Micro Kiosk reduces vehicle retrieval times and frees up your employees to provide better service where they're needed.

## *Great for monthly parkers, hotels, and office buildings*

Let your cashiers attend to transients while you cater to your monthly parkers by allowing them to bypass the line and serve themselves. They simply scan their valet ticket or their barcoded monthly parker card and they know they'll have their vehicle delivered reliably and as soon as possible. Hotels that offer free in-and-out privileges to overnight guests love how the Vehicle Request Micro Kiosk takes the customer experience to a whole new level. Place them in the lobby, near the valet station, or, for the ultimate convenience, on every floor.

## *Secure Revenue Control*

ZipPark's Vehicle Request Micro Kiosk will never allow a customer to request their vehicle if there is a balance due. Instead, it will respectfully ask them to see a cashier.

## *Tailored to Environment*

Every screen can be customized to fit perfectly in its environment. Logos, backgrounds, and all messaging are completely up to you.

# Vehicle Request Micro Kiosk

---

## Motorola signature laser scanning technology

Delivers aggressive performance and accurate capture of all 1D bar codes—even damaged and poor quality; patented. Liquid Polymer scan element is frictionless for superior durability and reliability.

## Ease of use

Intuitive aiming pattern enables easy scanning of bar codes. Comprehensive networking options: IEEE 802.11a/b/g and Powerover-Ethernet support provides the flexibility to easily connect to your wireless or wired LAN. Compact 5.6 in. x 5.1 in. form factor with a slim 1.7 in./4.2cm profile.

## Easy to deploy virtually anywhere

Compliant with VESA standard mounting. Support for standard VESA brackets enables easy mounting of the MK500 on shelves, walls and other locations. Marketing and signage flexibility. Easy to attach and change signage; allows businesses to draw attention to the presence of the MK500 as well as provide customerfacing information.
